

*Mind The Gap: How We Can Talk With  
People Who Disagree With Us*

George Marshall

# A Welsh narrative

**We are proud of the hard work of the people who built our country.**

**It was our natural resources that built our country. And we are also rich in the natural resources that will meet these new challenges.**

We are proud of who we are.....

We need to protect the things we love....

We are proud of the people in the oil, gas and coal industries who have contributed to our prosperity and way of life....

Alberta was built on natural resources and energy and we are rich in the natural resources for new forms of clean energy....

These new energies will bring many benefits...

Coping with climate change and changing to new energy will not be easy but we can do it because Albertans are....
