Re: B.C.'s recommitment to the Renewable and Low Carbon Fuel Requirement Regulation

Dear Minister Bennett,

The Energy Forum is a collaboration of British Columbian power producers, industry associations and non-government organizations that are working together to address the challenges and opportunities presented by the nexus of energy, climate and ecosystems.

We'd like to thank you for recommitting to the Renewable and Low Carbon Fuel Requirements Regulation. The policy is a pillar of British Columbia's efforts to maintain its climate leadership while growing its economy. Maintaining its targets will continue to drive down carbon pollution while incenting new, innovative and local businesses to produce cleaner fuels.

Electricity, when produced responsibly from renewable sources, is one of these fuels. We expect this policy, in concert with other policies, will help spur demand for electric vehicles among other options for reducing carbon pollution in the transportation sector.

We look forward to working on short and long-term policy recommendations,

Sincerely,

Merran Smith, Executive Director
Clean Energy Canada
